ALX teaching philosophy

We offer **transformative learning journeys**.

It is not about the individual piece of content or assessment. Learning can be tough and uncomfortable, but it is supposed to **stretch and change you**.

We believe people **“learn by doing”**.

Our content is built around **practical problem solving** and **real-world** portfolio project deliverables.

We don't just give the **answers**.

We teach students the **skills to find the answer** and solve the problem themselves.

ALX teaching philosophy

We teach **skills** that
are **relevant**.

The skills we teach are informed by the **latest trends and industry best practices**.

We work as part of a greater **community of data professionals** who bring valuable and relevant skills to the masses.

You will leave ALX with **real-world exposure, practical knowledge**, enviable **problem-solving skills**, and the ability to distill the **purpose and value** of your work to many stakeholders.

We do everything...

in the context of solving real-world problems

Real impact

- Data analysis is about asking the right questions.
- Looking for solutions to problems that will make a difference.
- Impact is the biggest focus.

Messy process

- This is not going to be an easy process; we are here to test your resistance.
- You will need to be prepared to get into detail; 60% of data science is about data preparation.

Real insights

- There is no right answer.
- The goal is to improve our understanding of the problem enough to be able to offer insights.

We believe in...

NEED and VALUE above the mere use of TOOLS

Keep focused on the **purpose** and what **is important**.

Problem solving and **learning how to learn** will serve you throughout your career.

The tools and technologies are useful to decide **HOW something is done**, but **not WHY it is done**.

**Core outcomes
framework**

ALX Adventurer dimensions

ORBIT

Complete mastery – no longer “fighting gravity” but using it in harmony with the forces to stay their course.

ASCENT

What we expect of ADVENTURERS who will quickly ascend – rapidly develop themselves and those around them.

LAUNCH

The basic or minimum requirements we expect of students so they are able to launch into a career.

Core outcomes

Core outcomes

WAYS OF WORK		SELF	TEAM	PROCESS
EFFORTLESS	ORBIT	Complete self-ownership with the ability to effortlessly perform and deliver professional work.	Inspires the team, adapts to emerging needs, understands and articulates value.	Able to run effective meetings that involve different stakeholders. Freely provides meaningful insights and feedback.
AUTONOMOUS				
COORDINATE	ASCENT	Self-aware and takes initiative to deliver independent, integrated, and accurate work on time.	Accountable to team outcomes, able to coordinate team effort and manage team flow.	Proactively communicates emerging issues, work lag, and help needed. Provides clarity and support to the team.
INDEPENDENT				
ALIGN	LAUNCH	Understands and follows instructions to complete given tasks reliably and satisfactorily.	Understands their role and responsibility, as well as impact on the team and its outcomes.	Clearly reports on given tasks, asks questions to seek clarity and support.
REPEAT

What does mastery mean at ALX?

Being a master data practitioner **isn't limited to being an expert** in solving data problems and being able to distill **technical** knowledge.

Mastery is also about:

Inspiring others, embracing uncertainty, making an impact, being self-aware, taking ownership, and many other abilities.

As a result, our growth path should not only focus on technical skills. We should also aim at **expanding our attitude** and **improving our ways of work**.

alx

**Understand and
take ownership of
your learning**

We believe...

it is crucial to engage and develop different ways of thinking

Some ways of thinking might come to you naturally.

Others will be uncomfortable.

Through **discipline** and **self-awareness** you can learn and expand your ability in the outcome dimensions.

We believe...

a learning journey is a balance of comfort and discomfort

However, not all journeys are the same

Your experience will depend on prior knowledge and experience, as well as the **people who share the journey with you.**

A facilitator, tutor, or a peer with prior experience can:

- Bring structure and comfort by **providing answers.**
- Induce further transcendence by **asking questions.**

However, **this is your learning journey.** The journey will only be what you put into it.

So, **ask hard questions, give good answers,** and **share** in the journey of others.
